FPE-1

Wireless position switch with energy generator 48 x 32 x 11.5 mm, blue. Generates the power for wireless telegrams itself when the lever is pressed, therefore there is no battery, no connecting wire and no standby loss.

When pressing the operating lever a wireless telegram Data (hex) 0x10 is sent and when releasing Data (hex) 0x00 is sent, like a wireless pushbutton. For more than 100.000 switching cycles, replaceable compression spring.

FPE-1	Wireless position switch without battery or wire, blue	Art. No. 30000398	70,00 €/pc.
