FA250, FHM175 AND FA200

Wireless antenna **FA250** with magnetic base and 250 cm cable, black or white

The small enclosed wireless antenna of the wireless antenna modules and several wireless trans-
mitter modules are replaceable by this larger 868MHz-HF-antenna to receive and transmit wireless
signals to or from metal control cabinets.

It is mounted on the magnetic base externally and the 250 cm cable is routed inside the cabinet. The best
performance is achieve by attaching the magnetic foot on a metal surface. The transmit and receive
ranges are almost spherical around this antenna. Antenna height, only 10 cm. With SMA screw terminal.
Extension by 5 m using wireless antenna extension FAV5 or by 10 m using FAV10.

HF ground FHM175 for the HF wireless antenna FA250, aluminium disc powder-coated (similar to
RAL 9006) white aluminium, 4 mm thick, 175 mm diameter.

This HF ground optimizes the receiver and transmitter performance of the HF antenna FA250 (not
included in the scope of supply) since the diameter has twice the length of the antenna plus its bar
diameter.

A deepened steel disc with the diameter of the magnetic antenna coil is pressed into the center. Thereby
the FA250 can easily be centered. The aluminium disc is formed with a hole and a slot to be fixed to the wall.

High-performance receive antenna FA200 with magnetic base and 200 cm cable.

This antenna has a radial gain of up to 7 dBi and therefore has a much greater range than wireless
antenna FA250. As a trade-off the receive power along the antenna axis is considerably lower. This must
be taken into consideration when positioning the antenna. **It may only be used as a receive antenna.**
Antenna height 59 cm. With SMA screw terminal.

Extension by 5 m using wireless antenna extension **FAV5** or by 10 m using **FAV10**.
