RS

Rain sensor

The rain sensor RS reports rain to the sensor switch LRW12D connected in series once per second. A standard telephone wire is sufficient as connecting lead: J-Y(ST)Y 2x2x0.8 or equivalent. 100 m line length is permitted. Solid plastic housing, L x W x H = 118x96x77 mm. Protection degree IP44. Temperature at mounting location -30°C to +50°C. A power supply unit WNT61-24VDC/10W or WNT15-24VDC/24W (chapter 17) is required for the power supply, including heating of the rain sensor (1.2 W). An LED lights up green when the supply voltage is applied and lights up yellow for rain.
